GRANT AWARDING POLICY

The Community Council has decided that, in line with its wishes to help a diverse range of local activities, it needs to have a specific policy against which to judge applications for financial assistance.

Each year the Council will allocate a sum in its budget for grants. This sum will include amounts which are payable either under Section 137 of the Local Government Act or another statute. Whilst this is a ceiling sum and the amounts will, logically, decrease as the financial year progresses, applications will be considered at any price.

The following are the agreed criteria against which applications will be judged:

- The activity in question must meet a perceived local need and benefit the community
- The grants will not be made where other public finance is wholly available
- Normally, grants will be made for capital projects not revenue
- In the case of charity requests, they must be for a local charity
- Normally there will be a ceiling of £1000 pa for any award
- Whilst the above constitute the general criteria, the Council reserves the right to ask for any supporting information which it feels relevant to help in its decision making.
